Disclaimer

This material has been designed as a Focus Module for the preliminary course of Engineering Studies for the NSW Board of Studies Preliminary Curriculum. It has been pitched at the level of grade 11 students in NSW, Australia, and aims to provide an introduction to photovoltaics as well as some other areas of the HSC course. The course materials are intended for educational use only and are not to be used for commercial gain or as a reference text for system design or maintenance.

The material & software may contain errors in some places (e.g. redundant or dead links). Referencing of some material is also incomplete, however, we have included rough references where original sources were unattainable. There is also likely to be some inaccurate information somewhere in the materials that have not been detected during our editing process. With the intent of making an educational resource, the course developers & the University of New South Wales cannot be held liable for any damages caused as a result of information contained in these course materials.
